

HGF - Related ELISA Kit

HGF - Related ELISA Kit				
Code No.	Name		Volume	
27401	Human	Activated HGF Assay Kit - MCM	96 well	
27402	Human	Total HGF Assay Kit - MCM	96 well	
27403	Human	Activated HGFA Assay Kit - MCM	96 well	
27404	Human	Total HGFA Assay Kit - MCM	96 well	
27405	Human	HAI-1 Assay Kit - MCM	96 well	
Coming soon	27406	Human	HAI-2 Assay Kit - MCM	96 well
	27407	Human	c-Met Assay Kit - MCM	96 well

Hepatocyte growth factor /Scatter factor (HGF), which is isolated and purified from the plasma in patients with fulminant hepatitis, is a growth factor implicated in hepatic regeneration. Blood and tissue HGF concentrations in patients with hepatic damage have been studied, while HGF concentrations in biological fluids have been reported to increase in patients with other diseases (e.g. inflammatory diseases, neoplastic diseases, and fibroses).

- Can measure blood level of HGF-Cascade related factors with high sensitivity
- Applicable to cell culture supernatant
- Can measure active and total (inactive and active) HGF respectively
- Can measure secreted forms of HAI-1 and HAI-2

Immuno-Biological Laboratories Co., Ltd. has distribution rights for the (HGF-related ELISA) Kits from Mitsubishi Chemical Medience Corporation

Immuno-Biological Laboratories Co., Ltd.
 5-1 Aramachi, Takasaki-shi, Gunma 370-0831, JAPAN
