Product Information

Recombinant human Interferon gamma protein

Catalog Number: IBIFG4001

BACKGROUND

Description

Nature human interferon-gamma is composed of 143 amino acid residues without cysteine residues and is glycosylated. Recombinant human interferon-gamma was expressed in E. coli and purified by FPLC gel-filtration chromatography, after refolding of the isolated inclusion bodies in a renaturation buffer. Additional amino acid (Methionine) is attached at N-terminus.
